

NITIN KANZARIYA

Full Stack Developer | MERN · Next.js 14 · TypeScript · Node.js · RAG · LangGraph
Ahmedabad, Gujarat, India | +91 77788 77805 | nkanzariya40@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Full Stack Developer with 3+ years of experience building and shipping production-grade web applications across MERN, Next.js, TypeScript, and Python/FastAPI stacks. Experienced across the full delivery lifecycle — from UI component design and REST API development to database modelling, cloud deployment on AWS ECS Fargate, and CI/CD automation. Delivered 6+ production systems spanning e-commerce platforms, real-time monitoring dashboards, trading management tools, AI-powered chatbots, and multi-tenant SaaS products. Strong collaborator with a track record of leading code reviews, improving test coverage, reducing bug rates, and shipping features on time in Agile environments. Currently deepening expertise in AI integration, RAG pipelines, and LangGraph-based orchestration alongside core full stack work.

TECHNICAL SKILLS

Frontend: React.js, Next.js 14, TypeScript, Angular, JavaScript (ES2023), Tailwind CSS, Material-UI, Redux, Zustand, Styled Components

Backend: Node.js, Express.js, Python, FastAPI, RESTful APIs, BullMQ, Socket.IO, WebSockets

AI / ML: LangChain, LangGraph, RAG Pipelines, PageIndex, LLM Integration (OpenAI, Gemini, Ollama), Multi-LLM Routing, Prompt Engineering

Databases: MongoDB, PostgreSQL, MySQL, Redis, Mongoose, SQL Server, Vector Databases

DevOps / Cloud: Docker, Git, GitHub Actions CI/CD, AWS ECS Fargate, AWS S3, AWS ECR, AWS CloudFront, AWS Secrets Manager

Testing: Jest, Vitest, Unit Testing, Integration Testing, TypeScript strict mode

Other: Microservices Architecture, RBAC, Stripe API, Microsoft Graph API, Webpack, Agile / Scrum

WORK EXPERIENCE

iTechOps — Ahmedabad, Gujarat

Oct 2024 – Feb 2026

Senior Full Stack Developer

- Architected Aegis, a multi-tenant AI SaaS spanning 3 microservices (Next.js, Express.js, FastAPI) with LangGraph agent pipelines, PageIndex RAG, TypeScript-first codebase, and Stripe billing
- Designed AI DB Tool Access feature with AES-256 encrypted credential vault, multi-DB adapters (PostgreSQL, MySQL, MongoDB), LangGraph tool-selection node, and parameterised query abstraction — achieving 0 SQL injection surface
- Deployed 3-microservice architecture on AWS ECS Fargate with GitHub Actions CI/CD and Docker images pushed to AWS ECR, achieving zero-downtime deployments with sub-8-minute release cycles
- Implemented Redis-cached tool query results and BullMQ async worker pipelines, targeting <3s response time for 20 concurrent widget sessions under load
- Built and maintained 5+ production web applications using React.js, Next.js 14, TypeScript, Angular, Node.js, FastAPI, and .NET APIs across multiple client projects
- Enforced TypeScript strict mode and Jest unit tests across sprint cycles, reducing bug carryover by ~30% and improving test coverage to ~75% on core modules

Aegis (Independent Project) — Remote

Mar 2026 – Present

Freelance Full Stack Developer

- Leading end-to-end development of Aegis SaaS product independently — full ownership of frontend, backend, AI pipeline, infra, and product roadmap
- Extending AI DB Tool Access with natural-language query support: LLM selects named tool + parameters; backend constructs parameterised queries across PostgreSQL, MySQL, and MongoDB via adapter pattern
- Shipping embeddable JS chat widget with per-tenant branding, LLM provider switching (OpenAI, Gemini, Ollama), and real-time BullMQ job queue for async AI workloads
- Iterating on sprint-based delivery with LangGraph pipeline optimisations, PageIndex retrieval tuning, and Stripe billing integration for subscription lifecycle management

React Developer

- Developed and shipped 3 production web applications (e-commerce, CRM, admin portals) using React.js, Next.js, TypeScript, and Tailwind CSS
- Integrated 10+ RESTful APIs and optimised frontend data-fetch pipelines with Axios and custom React hooks, reducing average load latency by ~20%
- Built reusable component libraries with Material-UI and Zustand state management, improving component reuse rate by ~40% across projects
- Led 50+ code reviews, resolved performance bottlenecks, and reduced reported application bugs by ~35% over 12 months

React Intern

- Built 5+ frontend features using React.js, Hooks, and Tailwind CSS — contributing to 2 live production deployments
- Participated in daily standups, sprint planning, and peer code reviews, establishing strong Git workflow and engineering fundamentals

PROJECTS

Aegis — Multi-Tenant AI Customer Support SaaS *(In Progress)*

TypeScript · Next.js 14 · Node.js · Express.js · Python · FastAPI · LangGraph · PageIndex · MongoDB · Redis · BullMQ · AWS ECS · Stripe

- Architected multi-tenant SaaS enabling businesses to deploy AI chatbots via embeddable JS widget; supports LLM provider switching (OpenAI, Gemini, Ollama) and per-tenant knowledge bases
- Designed 5-node LangGraph pipeline: Intent Classifier → PageIndex RAG → Response Synthesizer → Tool Executor → Human Approval Gate — with pause/resume state persistence in MongoDB
- Built AI DB Tool Access: LLM selects tool + parameters; backend constructs parameterised queries across 3 DB types via adapter pattern with AES-256 encryption and row-level tenant isolation
- Configured GitHub Actions CI/CD (lint → type-check → Jest → Docker build → ECR push → ECS deploy), reducing deployment cycle to under 8 minutes

RAG ChatBot — Enterprise AI Assistant

Next.js · TypeScript · Python · FastAPI · LangChain · Vector Database · MongoDB · Prompt Engineering

- Delivered production RAG chatbot achieving 90%+ answer relevance on structured/unstructured document queries across 100+ concurrent conversations
- Implemented multi-LLM routing (OpenAI, Gemini) with dynamic model switching based on use case and cost — reducing LLM inference cost by ~30% vs single-provider
- Built user-specific vector stores for personalised retrieval; supported real-time document ingestion (PDF, DOCX, TXT) with embedding pipeline and semantic search during active sessions

Status Page — Real-Time Monitoring Platform

.NET Core 6 · Angular 14 · TypeScript · C# · SignalR · SQL Server · Python · LangChain · WebSockets

- Built real-time WebSocket notification system (SignalR) processing 500+ events/day with email, SMS, and in-app alerts, retry mechanisms, and full audit logging
- Integrated custom RAG chatbot (Python/LangChain) for NL queries over system docs and live incident data — reducing support escalation by ~40%
- Implemented Slack slash command integration and RBAC securing 3 permission tiers (admin, operator, viewer)

MUFASA — Stock & Trading Management System

Angular · .NET 8 · TypeScript · C# · MySQL · Microsoft Graph API · WebSockets

- Delivered full-stack trading platform with Microsoft Graph API integration for Outlook email automation and dynamic email tagging workflows
- Designed optimised MySQL schemas managing 10,000+ financial transaction records with RBAC and real-time dashboard polling at 5s intervals

EDUCATION

MSc in Information Technology

Maharaja Krishnakumarsinhji Bhavnagar University, Gujarat

Jun 2021 – May 2023

CERTIFICATIONS

Microsoft Certified: Fabric Data Engineer Associate — Microsoft
