

NITIN KANZARIYA

Software Engineer | Full Stack Developer

Ahmedabad, Gujarat | [+91 7778877805](tel:+917778877805) | nkanzariya40@gmail.com | [LinkedIn](#)

Passionate and dedicated Full Stack Developer with over a year of professional experience in building dynamic, responsive, and scalable web applications. Skilled in React.js, Next.js, Angular, Node.js, Python, and .NET API development, with a proven track record of delivering high-quality solutions. Committed to continuous learning and staying updated with the latest industry trends.

SKILLS

Front-End Development: React.js, Next.js, Angular, React Hooks, Material-UI, Tailwind CSS, Styled-Components

Back-End Development: Node.js, Python Fast API, .NET API, RESTful APIs

Languages: JavaScript, Python, HTML, CSS

Version Control: Git

Other Skills: Testing and Debugging, Webpack, Responsive Design, Cross-Browser Compatibility, Axios, Agile Methodologies

WORK EXPERIENCE

iTechOps – Ahmedabad, Gujarat

Full Stack Developer | Oct 2024 – Present

- Developing and maintaining **scalable web applications** using React.js, Next.js, Angular, Node.js, and Tailwind CSS.
- Building and integrating **Python Flask APIs, AI-driven solutions, and .NET APIs** to support diverse business needs.
- Collaborating with senior developers to implement new features and deliver **end-to-end full-stack solutions**.
- Participating in **code reviews, sprint planning, and Agile ceremonies** to ensure high-quality, timely delivery.
- Optimizing application performance and integrating **complex back-end systems** for seamless user experiences.

Sarola Infotech – Barvala, Gujarat

React Developer | June 2023 – July 2024

- Developed and maintained **web applications** using React.js, Next.js, and Tailwind CSS.
- Collaborated with back-end teams to integrate **RESTful APIs** and optimize data flow.
- Implemented **React Hooks** and **Material-UI** for dynamic UIs and efficient state management.
- Conducted **code reviews**, optimized performance, and resolved application bugs to ensure stability.

React Intern | Dec 2022 – May 2023

- Assisted in developing **front-end features** using React.js and Tailwind CSS.
 - Worked closely with senior developers on **feature implementation** and bug fixing.
 - Gained hands-on experience with **React Hooks** and **Material-UI**, improving front-end expertise.
 - Participated in **code reviews, team meetings**, and followed best practices in web development.
-

EDUCATION

Maharaja Krishnakumarsinhji Bhavnagar University – Botad, Gujarat

Master of Science in Information Technology (MSc IT)

June 2021 – May 2023

Maharaja Krishnakumarsinhji Bhavnagar University – Botad, Gujarat

Bachelor of Computer Application (BCA)

PROJECTS

RAG ChatBot – Full Stack Developer | Next.js, Python, FastAPI, Vector Database, MongoDB

- **Libraries:** pytorch, langchain, numpy
- Designed and developed a full-stack AI-powered chatbot with customizable **LLM model switching** for flexible use cases.
- Implemented **personalized data stores** for user-specific responses and a **global knowledge base** for shared context.
- Integrated **file upload during chat**, enabling the AI to process and respond to documents in real time.
- Built a **separate chat storage system** to manage user interactions and maintain contextual accuracy.
- Leveraged **Vector Databases** for semantic search, context retrieval, and enhanced response relevance.
- Developed a scalable **FastAPI backend** with secure APIs for chatbot operations and data handling.
- Designed a modern, responsive **Next.js frontend** with real-time updates and smooth user experience.
- Used **MongoDB** for structured chat history, metadata management, and persistent storage.
- Focused on modular architecture for easy **LLM upgrades and integration of new AI models**.
- Delivered an intelligent assistant capable of personal data recall, document insights, and dynamic global knowledge access.

MUFASA – Full Stack Developer | Angular, Node.js, MySQL

- Developed and maintained a **full-stack application** with core modules for **stock and trading management**.
- Integrated **Microsoft Outlook** for seamless email communication and automated workflows.
- Implemented **dynamic email tagging** and advanced mailing features to improve communication efficiency.
- Designed and optimized **MySQL database schemas** for managing user data, stock records, and financial transactions.
- Built **responsive Angular front-end dashboards** to deliver real-time insights into stock and trading activities.
- Developed secure **Node.js backend services** to handle business logic, API integrations, and data synchronization.

Connection AI – Front-End Developer | Next.js, Tailwind CSS

- Developed a **responsive front-end application** for managing pharma-related chats and PDF documents.
- Implemented functionality to **upload, read, and extract data from PDFs** for seamless data access.
- Used **Redux Thunk** for state management and handling **asynchronous logic** in complex workflows.
- Recreated and optimized the **UI with Tailwind CSS**, ensuring a clean and user-friendly design.
- Integrated APIs with the front-end to support **chat features, document management, and real-time updates**.

Status Page ([Website](#)) – Full Stack Developer | .NET Core 6, Angular 14, SQL Server

- Designed and implemented a **real-time notification system** for transactional and event-driven alerts via email, SMS, and in-app push notifications.
- Built **REST APIs in C# and ASP.NET MVC** to manage notification templates and message delivery workflows.
- Integrated **SignalR and topic-based messaging** for instant updates and real-time communication.
- Configured **personalized notifications** based on user preferences and event triggers (e.g., order updates, promotions, security alerts).
- Connected with **SQL Server** to track notification states (sent, pending, failed) and ensure reliable logging and auditing.
- Developed an **admin dashboard** with retry mechanisms, delivery metrics, and analytics for system monitoring.
- Created a **Slack slash command integration** to update monitoring lists and record incidents directly from Slack.
- Implemented a **dynamic dashboard** with customizable charts and layouts for improved observability.

- Applied **role-based access control (RBAC)** to secure critical features and manage user/admin permissions.
- **Integrated a custom RAG (Retrieval-Augmented Generation) chatbot**, developed in **Python**, into the StatusPage as an **AI-powered assistant**:
 - Users can **query system documentation, monitoring history, and incident details** through natural language.
 - The chatbot provides **live outage status and real-time monitoring insights** by fetching current system data.
 - Acts as an **intelligent support companion** for both end-users and admins, improving system accessibility and troubleshooting efficiency.

Photo Gallery – *Full Stack Developer | Next.js, Firebase, Tailwind CSS*

- Developed a **responsive, cloud-based photo-sharing platform** with advanced filtering and Firebase storage.
- Implemented secure **authentication** using **email/password and Google OAuth**.
- Built **social features** including following friends, private/public photo uploads, and friend auto-suggestions.
- Added **real-time chat functionality** for seamless user interaction.
- Integrated **photo/video editing tools** and enabled posting of media content.
- Designed an **engagement system** with likes, comments (including nested likes), and live updates similar to Instagram.
- Optimized UI with **Tailwind CSS** for a modern, responsive user experience.

Hospital Management System – *Full Stack Developer | Flutter, Firebase Cloud Firestore, Google Auth, Firebase Realtime Database*

- Developed a **cross-platform healthcare app** enabling patients and doctors to manage profiles, appointments, and medical records.
- Implemented secure **authentication with Google Auth** and real-time data synchronization using **Firebase Cloud Firestore**.
- Built a **patient health reporting system** for storing and tracking medical data.
- Added **real-time chat functionality** between patients and doctors for direct communication.
- Designed workflows for **medical management**, appointment scheduling, and patient record handling.
- Leveraged **Firebase Realtime Database** for instant updates and synchronization across devices.
- Delivered a **user-friendly Flutter UI** with responsive design for both patients and healthcare providers.

ADDITIONAL DETAILS

- Strong understanding of full-stack application development lifecycle and deployment.
- Proven ability to work collaboratively in a team environment, delivering quality software solutions on time.
- Eager to leverage new technologies and frameworks to solve complex problems efficiently.
